TECHNOLOGIES

QUALITY EYE CARE, BECAUSE WE CARE

PATIENT JOURNEY

Elevated intraocular pressure (IOP) leads to the diagnosis of **glaucoma**

DIAGNOSIS

PRESCRIBE

Daily eye drops to **reduce** IOP and prevent blindness

A **single** IOP value is measured in 3-4 months at next appointment

EVALUATE

REPEAT

Patient continues treatment with **uncertainty** until next visit

100 MILLION

people in the world suffer Glaucoma

IOP Trends are Valuable to Glaucoma Management

2/3

experience peak
IOP **outside**
clinic hours

1/3

of patients can go
blind with
standard methods

20%

increase in
blindness with
delayed treatment

4x

increase in **costs**
(\$623 to \$2511)

Our Customer Discovery Shows ...

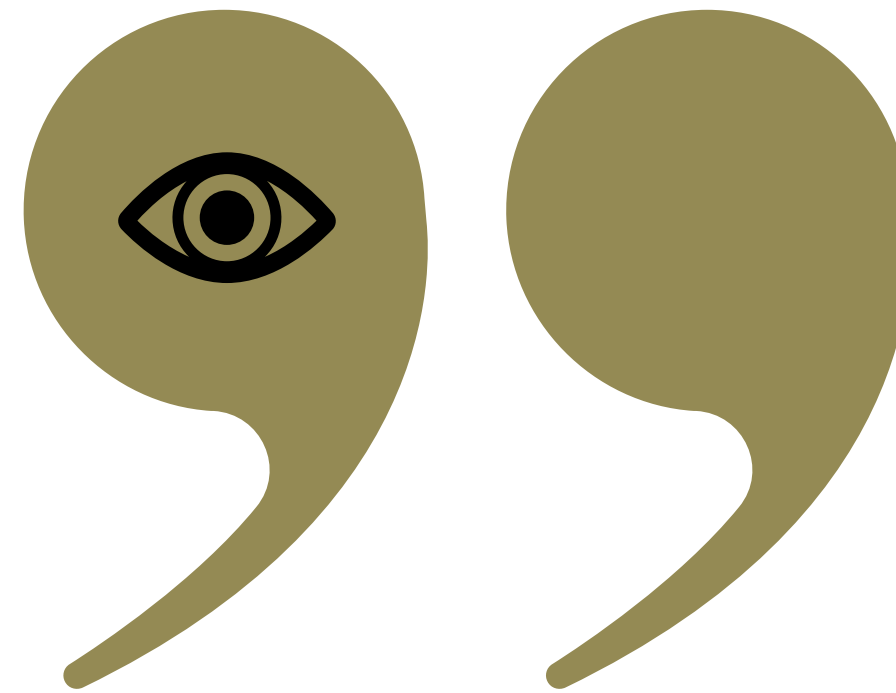

*“Timing matters when treating glaucoma patients and so, **more daily IOP data would help assess the efficacy** of the multiple eye medications and even compliance.”*

– San Francisco Optometrist

*“There is a **huge unmet need for more frequent IOP monitoring** outside of the doctor’s office.”*

– UCSD Ophthalmologist

*“**IOP is the most important parameter** for making changes to treatment plans and, if uncontrollable, can be reason for surgical intervention.”*

– UCSF Ophthalmologist

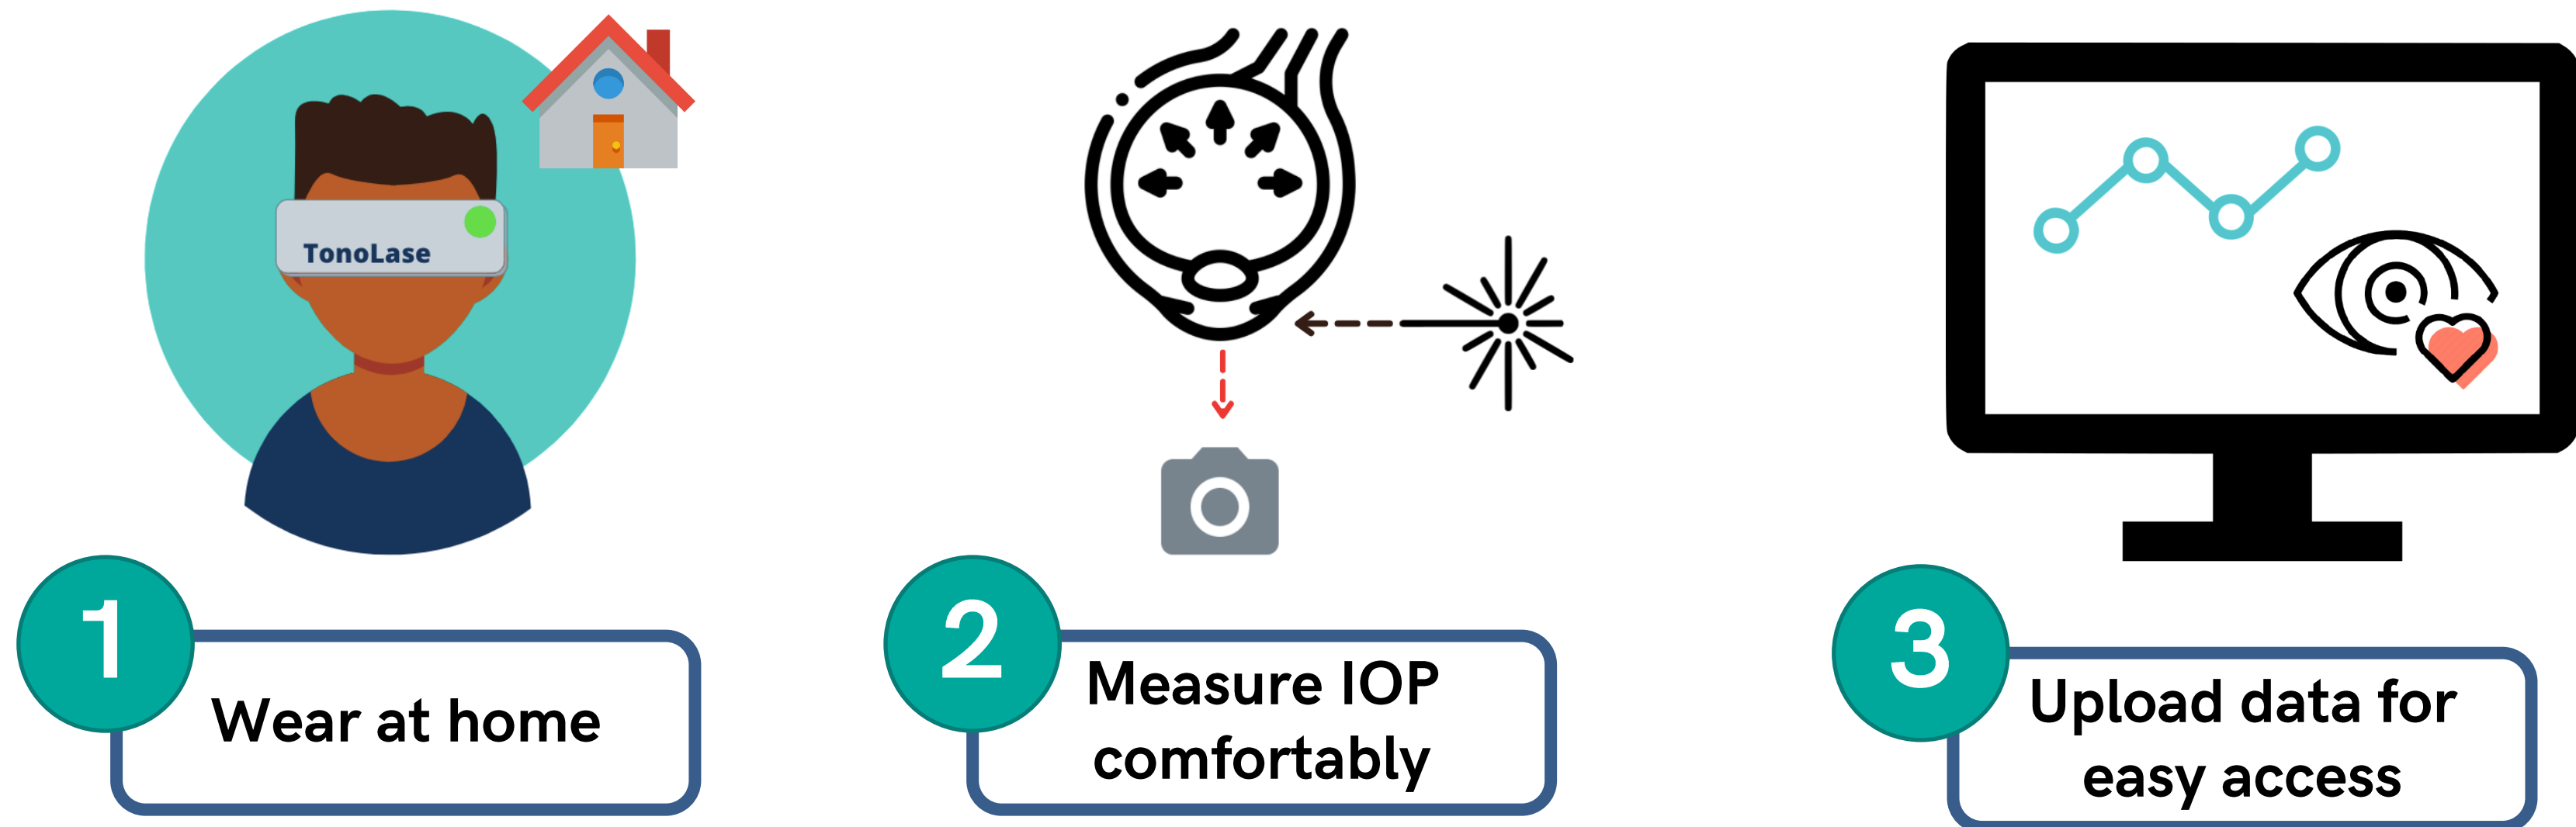

*“**Tracking spikes in IOP** provides valuable clinical information, especially for glaucoma specialists.”*

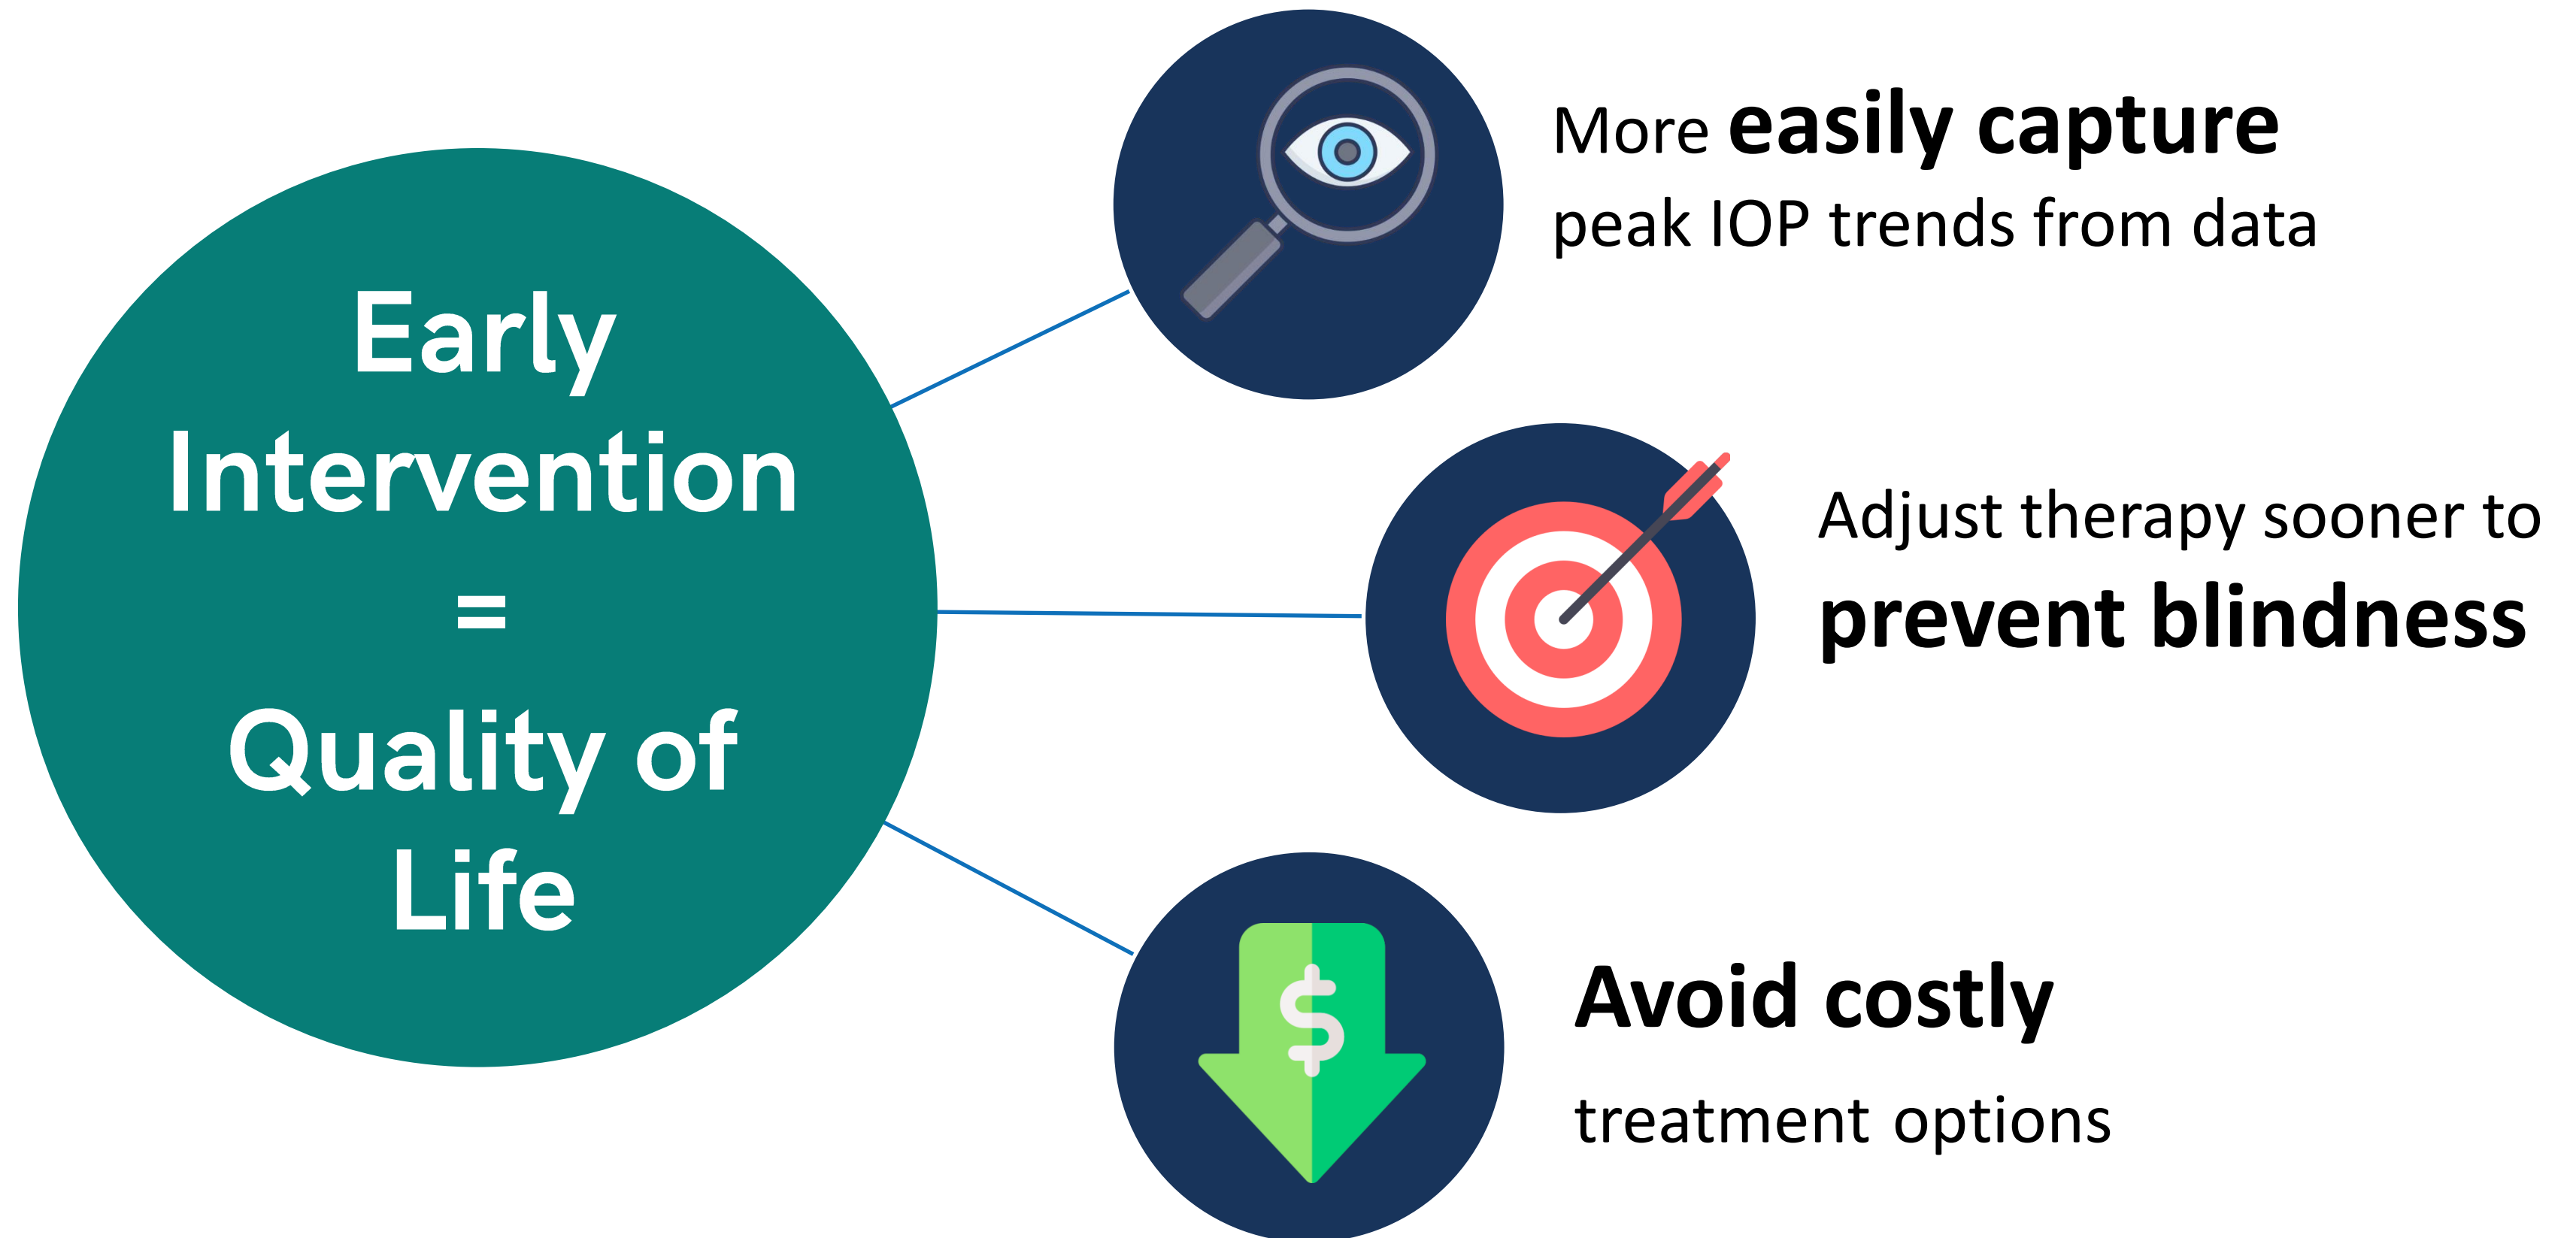

– UCI Ophthalmologist

Our Solution: **The TonoLase**

An at-home, eye pressure monitoring system to increase the frequency of IOP measurements

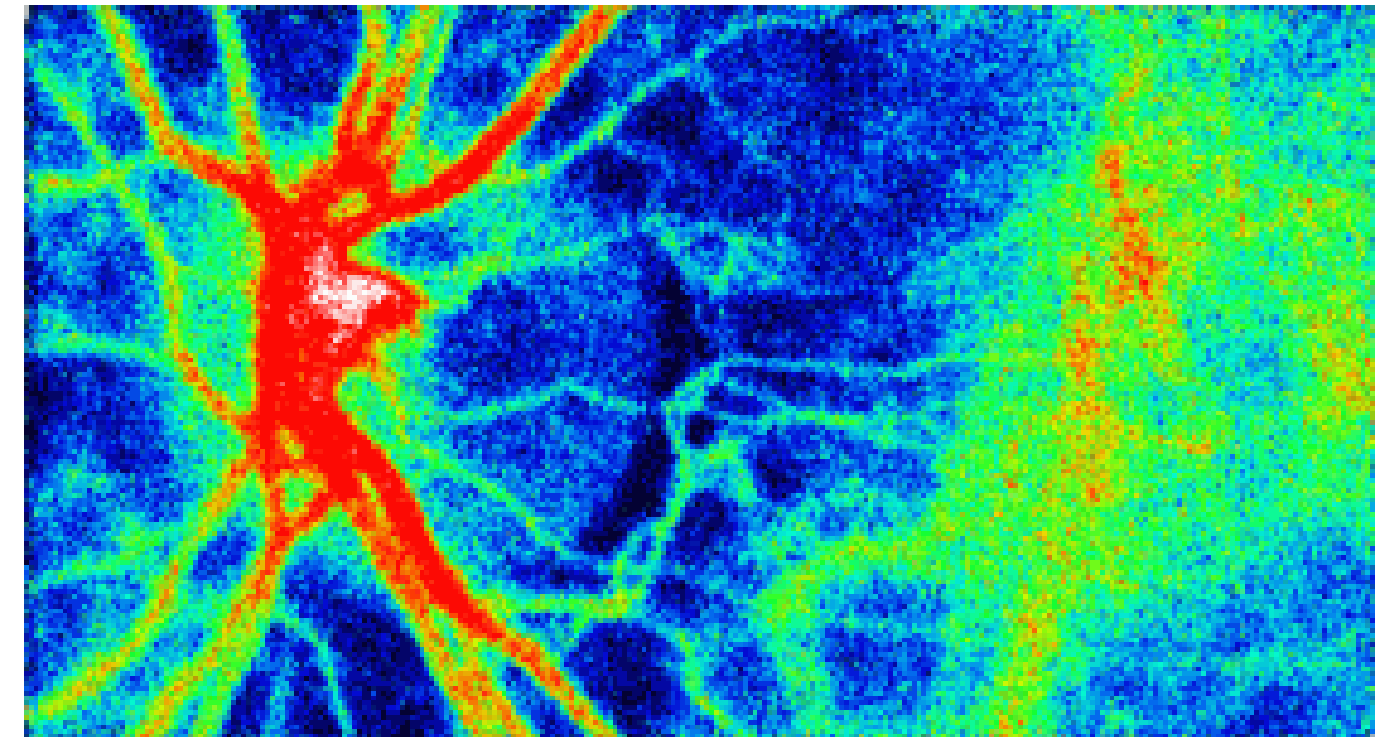

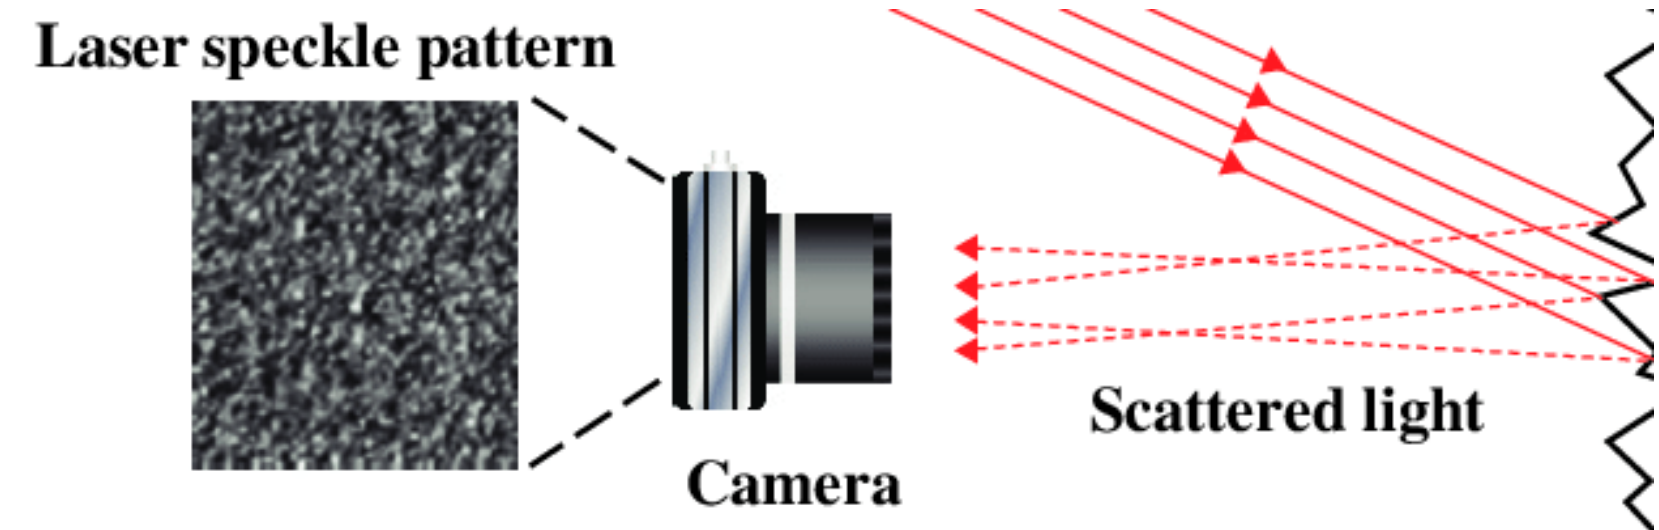

TonoLase Value Proposition

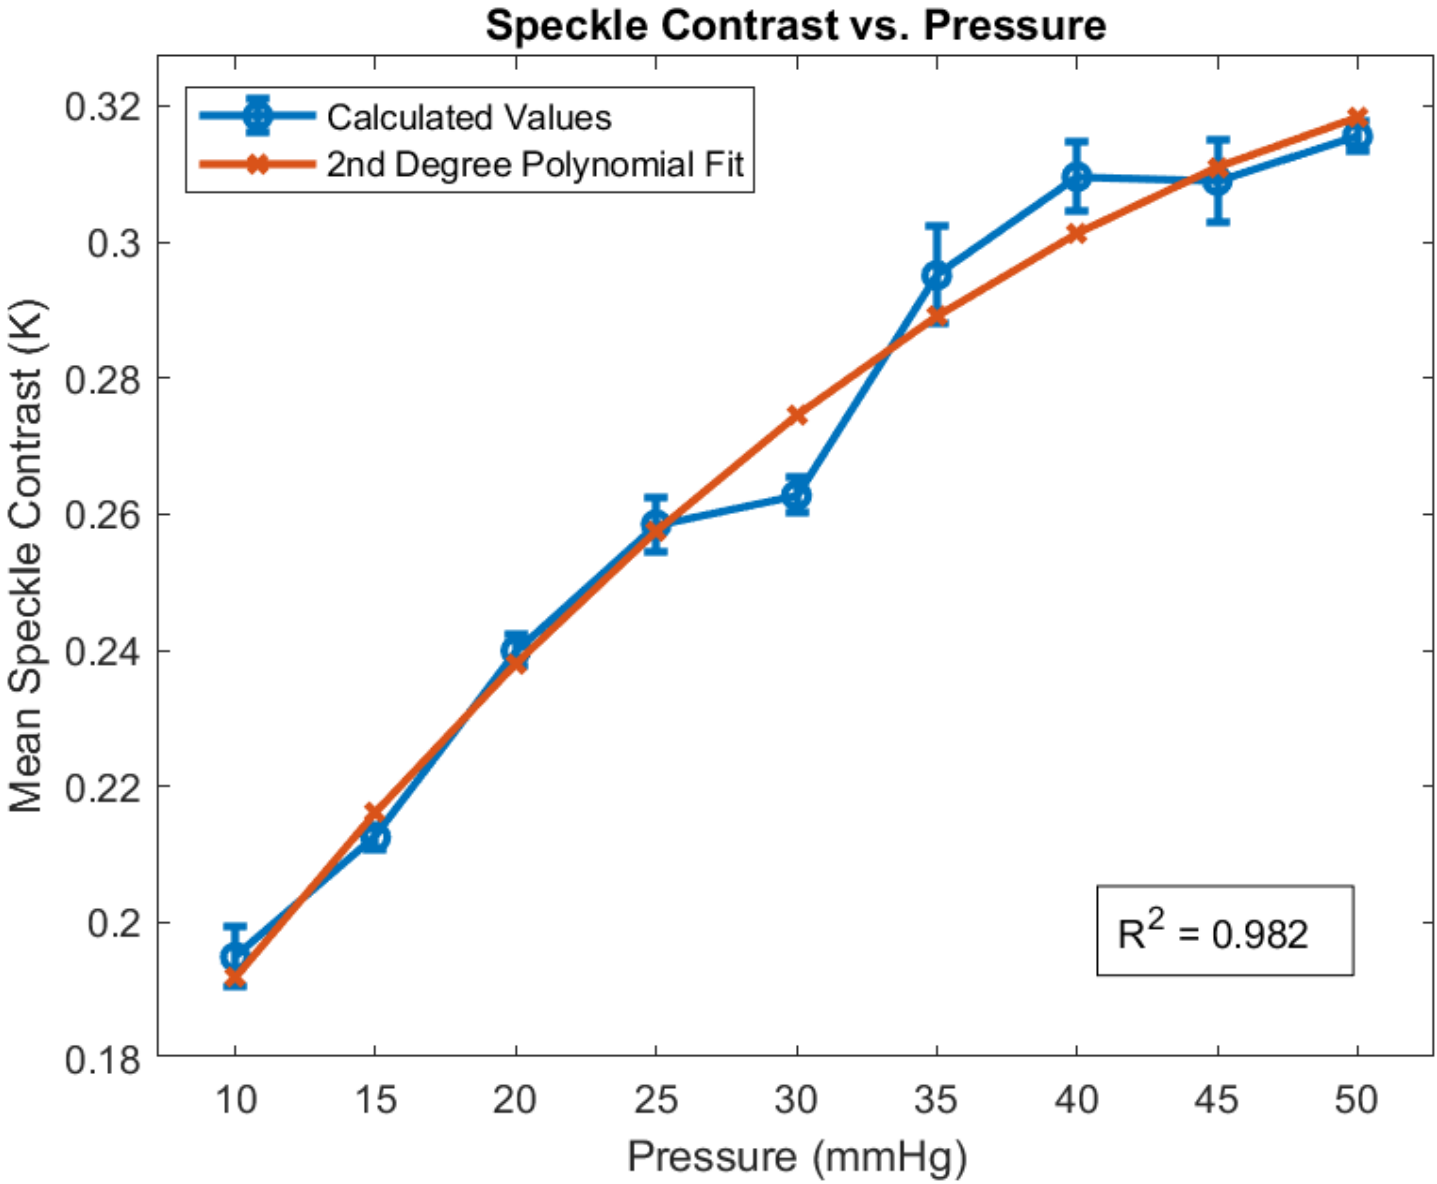

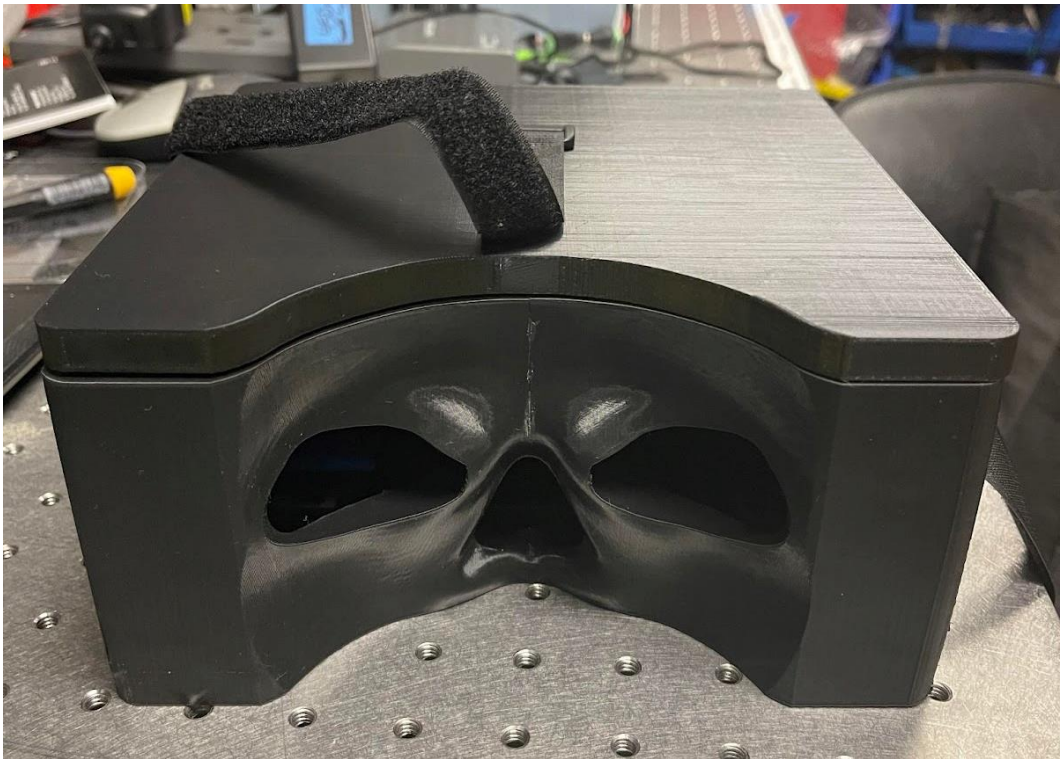

Laser Speckle Technology

Laser Speckle Imaging

- Speckle created from particles scattering light on imaging plane
- Dynamic fluctuations provide insight into region of interest
- Common modality in retinal blood flow
- Aqueous humor **responsible for IOP**
contains scatterers found in blood

Our Team

Aryan Agarwal

CEO & Co-Founder

BS Biomedical Engineering, UCI

Minor in Management

Pursuing MS in ECE with Medical Device
and Design focus at UCSD

Industry software and business
development skills

Francis Aguas

CTO & Co-Founder

BS Biomedical Engineering, UCI

Pursuing PhD in BME at UCI

Authored scientific publications in field
of point-of-care diagnostics

Experimental research and testing skills

Ruben Shakya

COO & Co-Founder

BS Biomedical Engineering, UCI

Specialization in Biophotonics

Extensive research at UCI and Vanderbilt
University in optical technologies

Industry photonics research and
development experience at Rockley

Our Mentors

Dr. Bernard Choi

Technical Mentor

Leading expert in laser speckle technology
Professor at UC Irvine and Beckman Laser Institute
Product Development and R&D

Dr. Rajat Agrawal

Clinical Consultant

Ophthalmologist and retina specialist at USC,
Doheny Eye Institute, and LA County Hospital
20+ years of clinical development, regulatory
strategy, and medical affairs experience
Founder, CEO, and President of Retina Global

Dr. Lilangi Ediriwickrema

Clinical Mentor

Board-certified ophthalmologist
Clinician at the UCI School of Medicine
Clinical Testing Guidance and Development

Dr. Ken Lin

Clinical Mentor

Glaucoma specialist ophthalmologist
Researcher at Gavin Herbert Eye Institute
Product Implementation and Customer Research

**Simple, comfortable, accessible
IOP monitoring solution**

**Allowing early intervention to
prevent blindness**
